

Pulsed Electro Magnetic Field Therapy

Research has proven neurological, physiological and psychological benefits with the use of Pulsed Electromagnetic Field (PEMF) therapy. Additionally, it has repeatedly shown BETTER tissue repair in LESS time, with NO adverse reactions. Cellular metabolism is boosted, blood cells are regenerated, circulation is improved and oxygen carrying capacity is increased.

PEMF therapy re-energizes damaged cells by inducing electrical changes within the cell that restore it to its normal healthy state.

Ultimately the immune system becomes healthier, the nervous system relaxes, bones and joints become stronger and vital organs are able to rid themselves of impurities, thus detoxifying the body. Pulsed Magnetic Field Therapy can reduce pain and improve the quality of your life by allowing your body to function as it was designed to do.

Now available in home/portable units – ask us about how PEMF treatment can be part of you and your families health routine
